EXPRESS, ENJOY AND SHARE

Since its establishment in 1921 Sakura has constantly been working on realizing innovative colouring, marking and writing instruments. As inventor of various products such as the oil pastel Cray-Pas and the gel ink technology for gel pens, Sakura has without a doubt radically changed our view of colours and writing. This constant strive towards innovation can be seen in our product range, varying from drawing instruments for creative applications at the highest level to functional writing materials for the home, office and industry.

SAKURA, WORLD OF INSPIRATION

SAKURA PIGMA

Sakura developed and patented PIGMA ink in 1982. It was the first ink in the world in which pigment and water were combined. This ink has since then become the standard for reliable, permanent, archival quality ink. Although it was originally developed as a technical drawing instrument, PIGMA is now used for numerous applications.

PIGMA MICRON

PIGMA Micron comes in eight nib sizes for drawing precise lines. The PIGMA Micron is loyally used by designers, scientists, archivers, Manga artists, cartoonists, illustrators and hobbyists. It is the recommended pen for Zentangle. If you need to place your signature or wish to illustrate something, PIGMA Micron is the right choice.

GELLY ROLL BASIC

The Sakura Gelly Roll Pen is the world's leading gel writer, thanks to its unique ink formulation with water-based pigment. The exceptional gel ink technology ensures smooth writing results without the need to apply pressure, and will leave even, defined lines when writing or drawing. It is not only a writing product, but extremely well-suited for different creative applications. Sakura has now implemented the smooth ink flow technology of Gelly Roll® White to three nib sizes: fine, medium and bold.
